

How to Set a Max Bid

With an auto bid, our system will place your bid at the minimum amount needed to lead. When you are outbid, our system will bid automatically for you until your maximum is reached. You will receive a text message when they have been outbid at your maximum bid amount.

1. Select the item you would like to place a maximum bid on.
2. Scroll down and click on the **Auto Bid** tab.

The screenshot shows a user interface for setting an auto bid. At the top, there are two tabs: 'Place Bid' (which is currently selected and highlighted in grey) and 'Auto Bid'. Below the tabs, the text reads 'Let us bid for you!' followed by 'Enter a bid of \$1000 or more and we'll increase your bid as needed to keep you winning until your amount is reached!'. There is a text input field with a vertical cursor and a green button labeled 'Bid'. At the bottom of the form, it displays 'Auto Bid: none' on the left and 'FMV: \$2,000' on the right.

3. Enter your maximum bid amount and click **Bid**.
